## Recent Projects

### eLearning, Web

02/2023 – 02/2023

Developed an e-Learning platform using React, Firebase, and Tailwind CSS, featuring registration and login systems with Firebase authentication and email verification. Used React Router and React Helmet for routing and dynamic titles. Delivered a responsive platform, overcoming challenges to ensure high quality.

### Know The Nation, WEB

12/2022 – 12/2022

Developed Know the Nation, a responsive web application that allows users to view details about every country using React, React Router, and Tailwind CSS. Utilized the Rest Countries API for data fetching and implemented a search functionality for ease of use.

### Furniture Mania, WEB

11/2022 – 11/2022

Furniture Mania build using React. I implemented cart functionality that limits users to add up to four products and prevents adding duplicate products. It is also responsive.
